# ADDRESS

— OF —

HON. MOSES H. GOODRICH, MAYOR,

— AT THE —

ORGANIZATION OF THE CITY COUNCILS,

September 22, 1874.

## GENTLEMEN OF THE CITY COUNCILS :

It has been customary for the Mayor-elect to address you briefly on the occasion of the annual reorganization of the city government, and to refer to the several subjects which will require your attention in the management of the affairs of the city. Being unexpectedly called to the duties of this office, I am able at the present time to give you little information which is not already in the possession of all of you. The last published statement of the city accounts up to the first day of January, 1874, was distributed in March. To collect and compare the accounts since that time so as to present an exact statement of the financial condition of the city, will require much labor which can be best performed with your assistance and after the organization of the several departments shall be completed. Exact statements of all the current expenses of the city ought soon to be made for your guidance, and I have no doubt the subject will receive your immediate attention.

The general policy which our constituents expect us to pursue, cannot be mistaken. Careful economy in the management of the public money, the reduction of all unnecessary offices, and the correction of abuses, are duties which must be kept in mind at every step in our administration. We are required to bring to the performance of the public business the same care and prudence we

would use in our own, while we must remember that we have no right to be liberal with the people's money, and that we ought to make no expenditures which are not authorized by definite laws. And under our present circumstances, I think we ought to confine the expenses of the city within the closest limits the laws allow.

The annual expenses of the city and the rate of taxation have increased since the formation of the city government at a rate which hardly admits of satisfactory explanation or excuse, and which must be checked or it will lead to disastrous results. The whole expenses for the year of 1849, one of the last of the town organization (exclusive of State and County taxes and the town debt and interest thereon, and a large appropriation for building the Haven school-house) were \$23,640.64, and the tax assessed was seventy-two cents on the hundred dollars. In the year 1857 the city expenses (excluding State and County taxes and debt and part of the cost of the High school-house) were \$32,211.19, and the tax assessed was eighty-one cents on the hundred dollars. In 1873 the city expenses (exclusive of State and County taxes and \$8,772.67 expended in the reception of the Sons of Portsmouth) were \$110,685.76, and the ratio of taxation has risen to two dollars and thirty-one cents on the hundred dollars. There is no reason to believe that the proportion of expenses has been less the current year. Making all reasonable allowances for the change in the value of gold and the debasement of the currency, I am unable to believe that this enormous increase in the expenses of the city and corresponding taxation of the people is either necessary or justifiable.

It is an evil attending the adoption of a city form of government by a small community, that the tendency is continually to imitate the manners and expenses of the larger cities; we adopt too much machinery, and use it without necessity. I trust it will be your effort, in which I shall co-operate to the extent of my ability, to reduce and cut off all extravagances and return as nearly as possible to the primitive simplicity of the better days of the republic.

I desire that the poor shall be supported with humane liberality, that the streets be kept in good order, and that the fire department be maintained in efficient condition; but I believe that in all these departments useful reform may be made and considerable saving effected.

The police and night-watch cost in 1873, \$6,269.78 ; in 1857, \$2,648.82 ; and in 1849 only \$2,070.65. It will deserve your consideration whether a large reduction may not be made here consistently with the safety and convenience of the public.

The large balance reported every year, of taxes uncollected, involves serious loss to the city. Your attention will be required to see what changes are necessary to secure the prompt collection of all taxes which ought to be paid, and the abatement of such as have been erroneously assessed, or which for any just cause ought to be remitted.

The natural advantages of the city are such as should invite population and capital and should secure all the advantages of good government at a very moderate cost. And it is worth while for all who have any interest in the city or who desire its prosperity, to co-operate to that end.

Gentlemen, I trust that your deliberations will be harmonious, and agreeable to you, and that I may have your unanimous assistance to maintain the institutions and promote the prosperity of the city.

ANNUAL REPORT  
— OF THE —  
CHIEF ENGINEER OF THE FIRE DEPARTMENT,  
FOR THE YEAR 1874.

---

TO HIS HONOR THE MAYOR AND CITY COUNCILS :

Gentlemen,—In compliance with the Ordinance defining the duties of the Chief Engineer, I herewith present the annual report of the condition of the Fire Department, a list of the fires that have occurred during the past year, the amount of property belonging to the city, under my charge, and a list of reservoirs, wells and hydrants, with their location.

The amount of money that has been expended by direction of the Engineers is \$8,313.05, of which \$5,178.75 was for the salaries of the members of the Department. \$7,514.63 of the amount was expended by direction of the last Board.

Steamers 1, 2 and 3 are in good working order.

Extinguishers 5 and 6 have been repaired the past year, and now I consider them in better condition than when purchased, with one exception—they need painting.

The Hook and Ladder carriage, with all its apparatus, is in good order ; also the horse hose carriage, and supply wagon.

The two hand engines kept at the arsenal, and the one kept at the alms house are in good order.

The steamer houses are in good condition with the exception of the floor in Nos. 1 and 3's houses. I would recommend that a brick floor with a granite track (like the one in No. 2's house,) be laid in each.

The reservoirs are in good condition, some having been repaired during my term of office.

There has been added to the department the past year one

thousand feet of the New England Rubber Lined Linen Hose ; one Noyes' Patent Engine Hose Oiler ; and two of Puppet's Relief Valves.

I would respectfully call your attention to the need of the following articles for the benefit of the department ; some of which have been recommended by my predecessor.

A suitable house for the Hook and Ladder carriage is very much needed. I would also recommend that the carriage be so altered that one ladder can be removed from the carriage without removing the others. In its present condition if one of the longest ladders is needed (which is the case invariably,) all the others above it, together with the hooks, poles, &c., have to be removed, thereby causing a delay in placing the ladders.

The supply of water away from the river is very inadequate for the wants of the department ; we have a number of good reservoirs, but the supply from the Aqueduct Company is so small. (being only through an inch pipe,) as to render them nearly all worthless in case of a large conflagration. I would recommend that an arrangement be made with the Aqueduct Company, whereby a supply pipe the size of the main log can enter the reservoir.

I do not consider the present arrangements for getting the apparatus to fires safe, especially in the summer season. The city horses are liable to be at the gravel pit on the Lafayette Road ; the hired horses may not be near the houses, thereby causing a delay that might prove disastrous. I think it would be advisable for the city to own two pairs of horses, one pair to be kept near the engine house all of the time.

I would recommend that the Steamer Dearborn and the hand engines be sold, and that an Amoskeag engine like the Kearsarge be purchased.

Respectfully submitted,

IRA C. SEYMOUR, Chief Engineer P. F. D.
